

Keep on moving and stay focused

Regardless of how long a meeting lasts, people need to stay focused while collaborating in large or small groups.

Qivi is built on a hybrid concept, with pivoting backrest and sliding seat and provides the movement people need to maintain concentration and alertness.

Qivi moves with the body and maintains energy levels so users can stay focused, enhancing productivity and efficiency.

People naturally want to shift position having sat in the same posture in a visitor chair for a lengthy period. However, most visitor chairs do not adequately enable such natural movement.

Qivi supports multiple postures thanks to its hybrid concept

How does it work? If your body tilts forward or backwards in the chair, the seat slides accordingly and the backrest pivots following your motion, providing ergonomic benefit and a high level of comfort.

This first-ever combination of pivoting back and sliding seat is a key feature in all models of the Qivi chair – sled, 4-leg or conferencing – and means the user enjoys complete comfort.
